

CQP and CFP Coupling Nylon

This high quality brand belongs to the product group “pressure blast systems”. Only the perfect configuration and match of all system components in a blast machine enable maximum blasting efficiency. Therefore Clemco offers an extensive and complete range of quality products.

CQP and CFP Blast Hose Coupling - Nylon

Our nylon blast hose couplings are produced with high precision and therefore they are easy to couple with each other. The additional safety pin provides extra safety while using a blast hose with pressurized air. Due to the usage of high quality raw materials, the nylon coupling is not inferior to other couplings and has a good constancy in long-term use. Furthermore, the nylon makes the coupling very light and easy to handle.

Our product range consists of different coupling sizes, which can be interconnected very easily, so that different blast hose sizes can also be used in one line. This makes blasting even more flexible and efficient, especially for long distances.

Area of application	suitable for different hose sizes
Blasting pressure	0 < > 12 bar
Operating temperature	-15°C < > +50°C

couplings nylon with screws and lock

item #	description	size
94350D	CQP-3/4	19 x 7 mm
08412D	CQP-1	25 x 7 mm
08413D	CQP-2	32 x 8 mm
08414D	CQP-3	38 x 9 mm
07714D	CQP-4	42 x 9 mm
07716D	CFP-1¼"	1¼" FG
