

Abrasive Metering Valve PT 1 1/4"

This high quality brand belongs to the product group "pressure blast systems". Only the perfect configuration and match of all system components in a blast machine enable maximum blasting efficiency. Therefore Clemco offers an extensive and complete range of quality products.

Abrasive Metering Valve PT 1 1/4" (TC)

The pneumatic PT metering valve allows an easy and fast installation at the place of action. Besides a perfect flow of the blast media, it allows an exact and economical abrasive metering. An optional control system (ACS) can be used to switch off the abrasive separately through the pneumatic system. This increases the functionality as well as safety and improves the abrasive flow when starting up the blasting pot, this is a significant advantage of the PT valve especially for use in automatic blasting installations.

Area of application	for every 1 1/4" blast pot
Minimum air pressure	5,5 bar
Maximum air pressure	12 bar
Abrasive media	suitable for every common media
Blasting pressure	0 < > 12 bar
Operating temperature	0°C < > 50°C
