CLEMCO®
INTERNATIONAL

Moisture Seperator HMS

This high quality brand belongs to the product group “pressure blast systems”. Only the perfect configuration and match of all system components in a blast machine enable maximum blasting efficiency. Therefore Clemco offers an extensive and complete range of quality products.

- Custom configuration
- High efficiency
- Innovative design

Engineered by Clemco

Moisture Seperator HMS
The moisture separator is the first inlet point for compressed air to the blast machine and eliminates remaining moisture. It does not replace the general need for dry air supply to the machine. Moisture in a blast machine system causes increased wear and clocking of media.

Area of application	dehumidification for blast machine air supply
