

Scraper Floor - Full Floor System

This high quality brand belongs to the product group “industrial systems”. Specialized engineers develop tailor-made solutions according to the customer-relevant technical, safety and performance requirements in order to meet every challenge in the steel industry.

Scraper Floor - Full Floor System

The scraper floor is a full floor system which is used for the automatic transport of used abrasive media. Together with other parts of the recovery system, it is responsible for the recycling and a continuous fresh supply of abrasive media for an economical blast process. A scraper floor is saving time, energy and money and is a central part of working efficient and economical.

Area of application	media recirculation
