

Stone Slabs Blast Cabinet

TA10105

Modified blast cabinet with four workplaces and media recovery at ground level of cabinet via M-Section.

Application	Manual pressure blasting of stone slabs in different sizes
Equipment solution	Four workplaces Integrated media recovery in ground level (M-Section) Cyclone with PU cover and Vortex pipe SC-2040 (100l) blast pot with 60° cone and pressure regulator
Application advantage	Large blast room without hopper. Due to the four workplaces, the operator can reach all spots of the workpiece without moving it.
Abrasive media	Aluminum oxide
Media reclaimer	M-Section with cyclone
Dust collector	MBX 2000/4 with 52m² filter area
Air requirements	1,3m³ / min at 7bar with 4,5mm nozzle
Blast system	Pressure blast system
Electrical requirements	2,2 kW filter unit 3x 400V, 50Hz
