

Pulsar VI PLUS pressure- and suction blast cabinet

TA12109

Modified universal blast cabinet for pressure- and injector blasting

Application	Flexible use as pressure- or injector cabinet for different surfaces and purposes
Equipment solution	40l pressure blast pot with media cyclone for abrasive cleaning 600cfm injector cyclone for abrasive cleaning with metering valve
Application advantage	The operation between pressure and injector blasting can be switched, without making a second cabinet necessary. The operator is more flexible in the preparation of the workpieces.
Abrasive media	every common media
Blast nozzle	CSD-5B (Ø 8mm, boron carbide) BNP Gun Ø 9,5mm
Media reclaimer	each system with cyclone
Dust collector	Pulsar PLUS cartridge filter with 2 cartridges (38,6m³)
Blast system	Pressure / Injector
